Application/Control Number: 09/919,891

Art Unit: 1652

## **DETAILED ACTION**

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, 8, and 9, drawn to an isolated polynucleotide coding for the metH gene, a vector, an Escherichia coli strain, and an coryneform bacteria strain, classified in class 435, subclass 252.32.
  - II. Claim 7, drawn to a coryneform bacteria in which the metH gene is enhanced, classified in class 435, subclass 252.1.
  - III. Claims 10 -19, drawn to a method for the fermentative production of L-amino acids in coryneform bacteria comprising fermenting in a medium coryneform bacteria which at least the metH gene is enhanced, classified in class 435, subclass 106.
  - IV. Claims 20-31, drawn to a process for preparing an L-methionine-containing animal feedstuffs additive, classified in class 426, subclass 534.
  - V. Claim 32 and 33, drawn to an animal feedstuffs additive, classified in class 426, subclass 544.
  - VI. Claim 34, drawn to a method for identifying RNA, cDNA, and DNA that encode for homocysteine methyltransferase II comprising contacting the RNA, cDNA, or DNA with hybridization probes, classified in class 435, subclass 6.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions of Groups I, II, and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Each of the products of Groups I, II, and V are independent chemical entities and require different literature searches.

Inventions of Groups III, IV, and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Each of the processes of Groups III, IV, and VI are distinct both physically and functionally and require different process steps, reagents, and parameters.

The invention of Group V is unrelated to the process of Group VI. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). The process of Group VI do not require the product of Group V.

The invention of Groups II and V is unrelated to the process of Group VI. Inventions are

Art Unit: 1652

unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). The process of Group VI does not require the products of Groups II and V.

Inventions II and III/IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as using coryneform bacteria in a recombinant process for the production of the enhanced metH protein.

Inventions IV and V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP §806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as a chemical synthesis process to make a L-methionine containing animal feedstuffs.

Inventions I and VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as using the polynucleotide in a recombinant process for the production of homocysteine methyltransferase II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian L. Fronda whose telephone number is (703)305-1252. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapura Achutamurthy, can be reached at (703)308-3804. Any inquiry of a general nature or relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703)308-0196.
